The Engine is a 20hp Onan P220 and it's a Wheelhorse 520H. Symptoms I did a compression check when the engine was cold and got 110 psi max. The manual says that between 75 - 115 psi is what I should be looking for, so I think I'm good on the compression side of things. The cylinder near the steering wheel is misfiring badly. It will misfire ...

the ticking noise I've heard on onan engines came from 3 different issues. One of the first ones was a loud valve ticking on a 97 416-H, took my buddy to look at it and he walked away scared of the noise. I did some wheeling and dealing between my buddy and the seller , by fixing his broken A/C system. anyways I brought it home and pulled the intake and exhaust off and found the cap fell off

## **Amazon.com: 20 hp onan engine parts**

Purchased a 1975 Roper 20T with the famous 20Hp Onan N52N engine. I guess this has sit out side for at least two years. I need to make sure it runs before I restore it.

## **20 HP Onan first start**

Hi, I need information on an Onan 20 hp . It has low compression in the rear cylinder but seems to run well after warming up. The last sentence is the OP's. I'm looking at buying it but want to know what I'm getting into. I did a search in the RS Engine forum and from what I found out , the rear seats come loose on these. Also ran across info about the valves carboning up and staying open.
