Finally, the Mechatronics is the "brain" of the transmission, a complex system of ports, valves and electronics that control all transmission functions. The one component of the entire system that's critical to all of these parts working properly together is the Automatic Transmission Fluid, or ATF. It acts as a hydraulic fluid, to engage clutch packs & shift the gears. It acts as a corrosion inhibitor and wear protection for the Planetary Gear sets.

Automatic Transmission Fluid Chart

Manual transmission fluid was traditionally very thick, which made it more difficult to shift in and out of gear, especially in colder climates. As a result, a growing number of manual transmission systems use automatic transmission fluid. However, an automatic transmission has never required manual transmission fluid.
