Populations 16-1
Genes and Variation
Darwin's original ideas
can now be under-
stood in genetic terms.
Beginning with
variation, we now know
that traits are con-
trolled by genes and
that many genes have
at least two forms, or
alleles. We also know

Population Genetics.
Population Genetics is the study of evolution from a genetic point of view (it is the study of microevolution).

Microevolution —a change in the collective genetic material of a population. Population —members of the same species that can interbreed.
