Chapter 18 Lab Dichotomous Keys

In this lab, you will first use a dichotomous key to identify sharks. A dichotomous key is built around pairs of statements that describe a visible trait. The reader must select the statement in each pair that best describes an organism. By following the steps in the key, the reader narrows down the list of choices and finally names the organism.

Working With Dichotomous Keys - Lesson Worksheets

The Bony fish (Osteon = "bone"; "ichthys" = "fish" = Class Osteichthyes) are the most diverse and numerous class of all vertebrates. Bony fish differ from most of the cartilaginous fishes in having a terminal mouth and a flap (operculum) covering the gills. In addition, most have a swim bladder, which is ordinarily used to adjust their buoyancy.
