BBC Four - Concorde: A Supersonic Story

The Aérospatiale/BAC Concorde is a British–French turbojet-powered supersonic passenger airliner that was operated until 2003. It had a maximum speed over twice the speed of sound, at Mach 2.04, with seating for 92 to 128 passengers. First flown in 1969, Concorde entered service in 1976 and continued flying for the next 27 years. It is one of only two supersonic transports to have been operated commercially; the other is the Soviet-built Tupolev Tu-144, which operated in the late 1970s ...

En route, it made the last supersonic flight by an airliner for the foreseeable future. Here at Aerospace Bristol it is preserved for future generations, at the birthplace of supersonic travel.

Where To Download Concorde Story Of A Supersonic Pioneer

Concorde's history — Aerospace Bristol

Supercruise is sustained supersonic flight of a supersonic aircraft with a useful cargo, passenger, or weapons load performed efficiently, which typically precludes the use of highly inefficient afterburners or "reheat". Many well known supersonic military aircraft not capable of supercruise can only maintain Mach 1+ flight in short bursts, typically with afterburners.
