## Spica Fuel Injection Diagnostics Guide

Eventually, you will unquestionably discover a extra experience and feat by spending more cash. yet when? reach you take that you require to acquire those every needs next having significantly cash? Why don't you try to acquire something basic in the beginning? That's something that will guide you to comprehend even more a propos the globe, experience, some places, in the same way as history, amusement, and a lot more?

It is your extremely own grow old to produce an effect reviewing habit. along with guides you could enjoy now is **spica fuel injection diagnostics guide** below.

We also inform the library when a book is "out of print" and propose an antiquarian ... A team of qualified staff provide an efficient and personal customer service.

### **Spica Fuel Injection Diagnostics Guide**

The fuel supply of the SPICA Fuel Injection System has traditionally proven to be the most troublesome part of the system. Specifically, the most common failures are: 1) Clogging of the rear in-line fuel filter. 2) Weak or failed fuel supply pumps. 3) Rusted, leaky, and dirty fuel tanks (that clog rear fuel filters).

## **Spica FI Manual | Centerline International**

The gasoline flows from the fuel tank (1) thru tank filter (2) and main filter (5) and feeds the injection pump (13). The excess fuel, acting also as a coolant for the injection pump (13), before returning to the tank, passes thru a calibrated orifice (15) which regulates the fuel pressure within the injection pump.

## **Spica pump diagnostic**

The primary method that the Spica system uses to regulate fuel pressure is the outlet restrictor on the front fuel fitting on the injection pump. This small hole allows excess fuel to be routed back to the tank. The hole is sized to have about 15 psi on the higher pressure side of the system, even with a pump like the L-Jet Bosch pump.

## **Easy Tips to Diagnose a Faulty Fuel Injector**

I would have thought that the L-Jetronic pump, designed to run at 42 +/- psi, would cause problems, but it is the recommended replacement pump for the Spica fuel injection system.

Apparently the L-Jet pump has a bit lower volumetric output, so the port has to be decreased in size to maintain the recommended pressure.
